

## Research Study Review Rubric

The rubric below is based on [Evidence for ESSA Standards and Procedures](#) to identify research study evidence of program and practice effectiveness, meeting ESSA levels of evidence standards. Locate relevant research studies for review and hyperlink them to the rubric's Research Study headings.

<b>RUBRIC: Studies on _____ Program</b>	<b>Research Study 1</b>	<b>Research Study 2</b>	<b>Research Study 3</b>
<b>STUDY CHARACTERISTICS:</b> <i>Well-designed, well-implemented</i>	Record <u>Yes</u> for each acceptable study characteristic.		
<b>Research Recency:</b> 1990 to present [Technology-based programs: 2000 to present]			
<b>Experimental Studies:</b> <ul style="list-style-type: none"> <li>• <a href="#">RCT</a> or <a href="#">QE</a></li> <li>• Correlational</li> </ul>			
<b>Pre-test Data (to establish initial <a href="#">equivalence</a>):</b> <ul style="list-style-type: none"> <li>• Study establishes baseline and post-assessment outcome measures and notes differences.</li> </ul>			
<b>Dependent Variable(s):</b> Includes quantitative measure of academic achievement. [Test developers were not involved in the study.]			
<b>Study Duration:</b> ≥ 12 weeks from beginning of the study through post-test.			
<b>Large Sample Size:</b> <ul style="list-style-type: none"> <li>• n ≥ 350 study participants with ≥ 2 teachers</li> <li>• ≥ 2 schools</li> </ul>			
<b>Sample Overlap:</b> RCT and QE study sample characteristics overlap by: <ul style="list-style-type: none"> <li>• Populations (i.e., types of students served)</li> <li>• Settings (i.e., rural, urban)</li> </ul>			
<b>Attrition:</b> Study participants drop out ≤ 15% to sustain similar experimental and control groups.			
<b>Replicable:</b> A program in the study must be replicable.			
<b>STUDY OUTCOMES:</b> <i>Positive Program Effects</i>	Record <u>Yes</u> for each acceptable study outcome.		
<b>Effect Size:</b> Study/evaluation reports the effect size (i.e., Small ES +0.05; Moderate ES +0.06 - +0.20; Large ES +0.21 or above)			
<b>Levels of Evidence:</b> <i>Demonstrates Causality or Correlation</i> <ul style="list-style-type: none"> <li>• <b>STRONG:</b> ≥ 1 qualifying RCT study w/ statistically significant positive effects on ≥ 1 major outcome measure.</li> <li>• <b>MODERATE:</b> ≥ 1 qualifying QE study w/ significantly positive effects on student outcomes.</li> <li>• <b>PROMISING:</b> ≥ 1 study w/ significantly positive effects without any statistically significant <i>negative</i> effects.               <ul style="list-style-type: none"> <li>○ Correlational study with controls for inputs/bias, or</li> <li>○ Per ESSA/WWC standards: RCT or QE studies with design/implementation of lesser quality.</li> </ul> </li> </ul>			

**Evidence Summary:**
